ClubGlider

The Status Quo has now Changed!

Would you like to remove 22 lbs. of pressure from your arms, shoulders, and back? Do you want to stop bending over to pick up your clubs only to move three feet in line? Wouldn't it be nice to remove the extra burden of your carry bag, and the awkward challenge of navigating airports with your golf clubs?

Introducing ClubGlider, the next evolution in golf travel bags. By integrating a set of retractable legs with caster wheels, ClubGlider supports 100 percent of the weight so you don't have to. ClubGlider eliminates the need to constantly bend over and pick up the traditional travel bag just to move 3 feet in line. With ClubGlider, you can breeze through the airports, saving your strength for your swing!

The ClubGlider Bag

- 1200 denier ballistic nylon
- Padding thickness and design taken to another level throughout the bag:
 - Extra thick padding extends past the frame of golf bag inside
 - Padded down the back, and sides (ClubGlider protects what's inside too)
 - Quilted padding provides superior impact protection to the top and front of the bag
- Zippered pockets accessible from inside, and out
- Will handle tour staff bag and up to 50" putter
- Load and unload without having to bend over
- Inside cinch straps – upper and lower – to secure golf bag during transit
- Brief case can be placed between carry handles on top, removing another 10–15 lbs.
- When not in use, ClubGlider collapses for simple storage
- Quality Sun Mountain design

The ClubGlider Engineering

- Spring loaded cantilever system
- By design, if the legs are not fully engaged they will retract.
- Legs and wheels add less than two pounds
- When the legs are recessed there are no exposed parts
- Engineered for airport use (and abuse)
- Cross bar is built to handle loading and unloading during transit
- Sewn handles facilitate easy loading and unloading
- Caster design engineered for durability
- Manufactured to Sun Mountain standards
